Table of contents

EDITORIAL

A birthday for the Forum. *Roscoe R. Robinson* 1

LABORATORY INVESTIGATION

Role of the urinary concentrating process in the renal effects of high protein intake. *Nadine Bouby, Marie-Marcelle Trinh-Trang-Tan, Denise Laouari, Claire Kleinknecht, Jean-Pierre Grünfeld, Wilhelm Kriz, and Lise Bankir, with the technical assistance of Monique Douté, Bruni Hähnel, and Christine Coutaud* 4

Effects of aldosterone on NEM-sensitive ATPase in rabbit nephron segments. *Lal C. Garg and Neelam Narang* 13

Mechanism of the antihypertensive effect of K depletion in the spontaneously hypertensive rat. *Stuart L. Linas, Rochelle Marzec-Calvert, Michael E. Ullian, and Richard F. O'Brien* 18

Interleukin 1 and the glomerular mesangium. III. Il-1-dependent stimulation of mesangial cell protein kinase activity. *David H. Lovett, Michael Martin, Stuart Bursten, Marta Szamel, Diethard Gemsa, and Klaus Resch* 26

Atrial natriuretic peptide and furosemide effects on hydraulic pressure in the renal papilla. *Ramón E. Méndez, B. Rentz Dunn, Julia L. Troy, and Barry M. Brenner* 36

Anti-Fx1A produces complement-dependent cytotoxicity of glomerular epithelial cells. *Richard J. Quigg, Andrey V. Cybulsky, Jerome B. Jacobs, and David J. Salant* 43

Contribution of the distal tubule to potassium excretion in experimental glomerulonephritis. *Eric E. Simon, Daniel Martin, David Trigg, and John Buerkert* 53

Regulation of Na/H exchange in renal microvillus vesicles in chronic hypercapnia. *Mark L. Zeidel and Julian L. Seifter* 60

CLINICAL INVESTIGATION

Cuprammonium membranes stimulate interleukin 1 release and arachidonic acid metabolism in monocytes in the absence of complement. *Margarita Betz, Gertrud-Maria Haensch, Ernst-Wilhard Rauterberg, Jürgen Bommer, and Eberhard Ritz* 67

Glutathione uptake and protection against oxidative injury in isolated kidney cells. *Tory M. Hagen, Tak Yee Aw, and Dean P. Jones* 74

Kinetics of peritoneal dialysis in children: Role of lymphatics. *Robert A. Mactier, Ramesh Khanna, Harold Moore, Julie Russ, Karl D. Nolph, and Ted Groshong* 82

Cyclosporine A enhances vasopressin-induced Ca^{2+} mobilization and contraction in mesangial cells. *Harald Meyer-Lehnert and Robert W. Schrier* 89

Rapid removal of DFO-chelated aluminum during hemodialysis using polysulfone dialyzers. *Bruce A. Molitoris, Allen C. Alfrey, Patricia S. Alfrey, and Nancy L. Miller* 98

A histometrical study on the development of three glomerulopathies. *Shiro Oguma* 102

Identification of glomerular immune deposits in cryoglobulinemia glomerulonephritis. *Renato A. Sinico, Christopher G. Winearls, Ettore Sabadini, Alessandro Fornasieri, Aldo Castiglione, and Giuseppe D'Amico* 109

Contents continued on next page

TECHNICAL NOTE

Measurement of urinary para-aminohippuric acid in glycosuric diabetics. *R. Neil Dalton, Martin J. Wiseman, Charles Turner, and Giancarlo Viberti* 117

JOHN P. PETERS AWARD

Fifth Annual John Peters Award, American Society of Nephrology. Award recipients: Jacob Churg and Conrad Pirani. *Ramzi S. Cotran* 121

NEPHROLOGY FORUM

Withdrawal from dialysis: An ethical perspective. *David C. Lowance* 124

INTERNATIONAL SOCIETY OF NEPHROLOGY

Meetings 137

Awards and Grants 139

KIDNEY INTERNATIONAL

Table of contents

EDITORIAL REVIEW

Polyclonal activation and experimental nephropathies. *Michel Goldman, Dana Baran, and Philippe Druet* 141

LABORATORY INVESTIGATION

Glomerular size-selective barrier dysfunction in nephrotoxic serum nephritis. *Paul A. Alfino, Joel Neugarten, Robert G. Schacht, Lance D. Dworkin, and David S. Baldwin* 151

Anionization of an antigen promotes glomerular binding and immune complex formation. *Jeffrey L. Barnes, Mary J. Reznicek, Robert A. Radnik, and Manjeri A. Venkatachalam* 156

Increased urinary excretion of thromboxane B_2 and 2,3-dinor-TxB_2 in cyclosporin A nephrotoxicity. *Ariela Benigni, Chiara Chiabrando, Antonella Piccinelli, Norberto Perico, Marco Gavinelli, Lucinda Furci, Osvaldo Patino, Mauro Abbate, Tullio Bertani, and Giuseppe Remuzzi* .. 164

The renal uptake of proteins: A nonselective process in conscious rats. *Alfred Bernard, Ali Ouled Amor, Claude Viau, and Robert Lauwerys* 175

Calcium and hypoxic injury in the renal medulla of the perfused rat kidney. *Mayer Brezis, Ahuva Shina, Gideon Kidroni, Franklin H. Epstein, and Seymour Rosen* 186

Nephritogenicity of proteoglycans. II. A model of immune complex nephritis. *Hirofumi Makino, Brigitte Lelongt, and Yashpal S. Kanwar* 195

Nephritogenicity of proteoglycans. III. Mechanism of immune deposit formation. *Hirofumi Makino, Brigitte Lelongt, and Yashpal S. Kanwar* 209

Plasma protein concentration and colloid osmotic pressure in nephrotic rats. *Peter L. Miller and Timothy W. Meyer* 220

Calcitriol synthesis is decreased in spontaneously hypertensive rats. *Sanjeev Patel, Robert U. Simpson, and Chen H. Hsu* 224

Intracellular distribution and depletion of glutathione in rabbit renal proximal tubules. *Rick G. Schnellmann, Siobhan M. Gilchrist, and Lazaro J. Mandel* 229

Impairment by cyclosporine of membrane-mediated functions in kidney mitochondria. *Tadeusz Strzelecki, Sanjaya Kumar, Raja Khauli, and Mani Menon* 234

Increased angiotensin II receptor binding with age in isolated rat glomeruli. *Barry M. Wilkes, with the technical assistance of Sabrina Silverman* 241

CLINICAL INVESTIGATION

Outcome of patients with human immunodeficiency virus on maintenance hemodialysis. *Carmen Ortiz, Ruth Meneses, David Jaffe, John A. Fernandez, Guido Perez, and Jacques J. Bourgoignie* .. 248

Dialysate volume measurements required for determining peritoneal solute transport. *John K. Leypoldt, Andreas H. Pust, Ronald P. Frigon, and Lee W. Henderson* 254

Co-localization of erythrocyte Ca^{++}-Mg^{++} ATPase and vitamin D-dependent 28-kDa-calcium binding protein. *James L. Borke, Junzaburo Minami, Anil K. Verma, John T. Penniston, and Rajiv Kumar* 262

TECHNICAL NOTE

Phosphate transport in the in vitro cultured rabbit proximal convoluted and straight tubules. *Makoto Suzuki, Anthony Capparelli, Ok D. Jo, Yoshindo Kawaguchi, Yosuke Ogura, Tadashi Miyahara, and Norimoto Yanagawa* 268

Contents continued on next page

HISTORICAL ARCHIVES

Theory of urine formation and uroscopic diagnosis in the Medical School of Salerno. *Antonio Dal Canton and Maria Castellano* 273

NEPHROLOGY FORUM

Uremic acidosis. *David G. Warnock* 278

ABSTRACTS

Table of contents

EDITORIAL REVIEW

Cytoskeleton organization and submembranous interactions in intestinal and renal brush borders. *Evelyne Coudrier, Doncho Kerjaschki, and Daniel Louvard* 309

LABORATORY INVESTIGATION

In vivo renal angiotensin converting enzyme activity decreases in glycerol-induced acute renal failure. *Robert L. Baranowski and Christof Westenfelder* 321

Renal cortical mitochondrial transport of calcium in chronic uremia. *Aviva Conforty, Ruth Shainkin-Kestenbaum, Varda Shoshan, Rina Kol, Jayson Rapoport, and Cidio Chaimovitz* .. 327

Determinants of immune complex-mediated glomerulonephritis. *Jochen W.U. Fries, Donna L. Mendrick, and Helmut G. Rennke* 333

Modulation of calcium oxalate monohydrate crystallization kinetics in vitro. *Dik J. Kok, Socrates E. Papapoulos, Leo J.M.J. Blomen, and Olav L.M. Bijvoet* 346

Adaptation to chronic hypoosmolality in rats. *Joseph G. Verbalis and Marcia D. Drutarosky* 351

CLINICAL INVESTIGATION

Regulation of glomerular filtration rate in chronic congestive heart failure patients. *Robert J. Cody, Susanne Ljungman, Andrew B. Covit, Spencer H. Kubo, Jean E. Sealey, Kathleen Pondolfino, Mary Clark, Gary James, and John H. Laragh* 361

Extra-renal production of calcitriol in chronic renal failure. *Adriana Dusso, Silvia Lopez-Hilker, Neville Rapp, and Eduardo Slatopolsky* 368

Confirmation of the utility of fine needle aspiration biopsy of the renal allograft. *J. Harold Helderman, Jose Hernandez, Arthur Sagalowsky, Ingemar Dawidson, Janis Glennie, Debra Womble, Robert D. Toto, Karl Brinker, and Alan R. Hull* 376

Prognostic indicators in patients presenting with the nephrotic syndrome. *Linda P. Hunt, Colin D. Short, and Netar P. Mallick* 382

Mesangiolysis in diabetic glomeruli: Its role in the formation of nodular lesions. *Yafumi Saito, Hiroshi Kida, Shin-ichi Takeda, Mitsuhiro Yoshimura, Hitoshi Yokoyama, Yoshitaka Koshino, and Nobu Hattori* 389

The role of aldosterone in potassium tolerance: Studies in anephric humans. *Allen Sugarman and Robert S. Brown* 397

The effect of dialysate on peritoneal phagocyte oxidative metabolism. *Nicholas Topley, Haifa M.M. Alobaidi, Malcolm Davies, Gerald A. Coles, John D. Williams, and David Lloyd* 404

Creatinine measurements often yield false estimates of progression in chronic renal failure. *Mackenzie Walser, Helen H. Drew, and Norman D. LaFrance* 412

NEPHROLOGY FORUM

Distinguishing minimal-change disease from mesangial disorders. *Wayne A. Border* 419

INTERNATIONAL SOCIETY OF NEPHROLOGY

Meetings 436

Awards and Grants 438

KIDNEY INTERNATIONAL

Volume 34, Supplement 25

Electrolytes, Hormones, and Blood Pressure
Marseille, France, April 26–29, 1987

Table of contents

Introduction. *Michel Olmer, Claude Jacobs, Shaul G. Massry, and David McCarron* S-1

ELECTROLYTES AND BLOOD PRESSURE

Ionic control of vascular smooth muscle cells. *Francis J. Haddy* S-2

Effects of saline infusion and canrenone on erythrocyte Na^+,K^+ pump activity. *Roberto Boero, Cesare Guarena, Maria Carla Deabate, Clelia Rosati, Giacomo Forneris, Francesco Quarello, and Giuseppe Piccoli* S-9

Magnesium and plasma renin concentration. *Michele Dechaux, Catherine Kindermans, Kathleen Laborde, Isabelle Blazy, and Charles Sachs* S-12

Plasma and erythrocyte magnesium concentrations in essential arterial hypertension. *Michele Buemi, Francesco Corica, Francesco Squadrito, Domenico Ceruso, and Nicola Frisina* S-14

Early effects of dietary calcium on blood pressure, plasma volume, and vascular reactivity. *Daniel C. Hatton, Martin Muntzel, David A. McCarron, Michael Pressley, and Richard D. Bukoski* S-16

Abnormal parameters of acid-base balance in genetic hypertension. *Philip A. Lucas, Bernard Lacour, Lydie Comte, David A. McCarron, and Tilman Drüeke* S-19

Augmented rise of α_2/β_2 adrenoceptor ratio induced by salt and essential hypertension. *F. Skrabal, P. Kotanko, B. Meister, P. Doll, and G. Gruber* S-23

HORMONES AND BLOOD PRESSURE

Enalapril-induced disturbance in the renal adaptation to sodium restriction in the rat. *Albert Mimran, Bernard Jover, and Madeleine Dupont* S-28

Role of renin as a blood-borne hormone tested by infusion of renin inhibitor (H.77). *Malcolm Tree, Robert Fraser, Christine Holloway, Maria Hughes, Mary Ingram, Brenda J. Leckie, Anthony F. Lever, John J. Morton, and Michael Szelke* S-33

Seven lessons from seven renin secreting tumors. *P. Corvol, F. Pinet, F.X. Galen, P.F. Plouin, G. Chatellier, J.Y. Pagny, M.T. Corvol, and J. Ménard* S-38

Response of isolated renal microvessel and tubule adenylate cyclases to PTH fragments. *Jean-Jacques Helwig, May C.M. Yang, Claude Bollack, Clement Judes, and Peter K.T. Pang* ... S-45

Role of glucocorticoids in blood pressure regulation. *Jean-Pierre Grünfeld and Laure Eloy* . S-49

Vasopressin and blood pressure. *Marc Thibonnier* S-52

Prostaglandins in blood pressure regulation. *Giulio A. Cinotti and Francesco Pugliese* S-57

Acute metabolic and cardiovascular effects of human and salmon calcitonin in gene-derived products. *Carlo Gennari, Renato Nami, Donato Agnusdei, and Jan A. Fischer* S-61

Atrial natriuretic hormone: A regulator of blood pressure and volume homeostasis. *John H. Laragh and Steven A. Atlas* S-64

Renal response to low-dose infusion of atrial natriuretic peptide in normal man. *Christopher Cottier, Lukas Matter, Peter Weidmann, Sidney Shaw, and Markus P. Gnädinger* S-72

Uranyl nitrate-induced acute renal failure in rats: Effect of atrial natriuretic peptide on renal function. *Ekkehart Heidbreder, Klaus Schafferhans, Andrea Heyd, Lothar Schramm, and August Heidland* S-79

Acute hemodynamic effects of atrial natriuretic peptide in essential hypertension. *Massimo Volpe, Nicola De Luca, Ciro Indolfi, Alessandro F. Mele, Maria Pia Rivera, Mario Condorelli, and Bruno Trimarco* S-83

Contents continued on next page

Plasma levels of atrial natriuretic peptide in chronically dialyzed patients. *G. Deray, G. Maistre, J.Y. Basset, P. Cacoub, A. Carayon, M. Anouar, A. Baumelou, J.C. Legrand, D. Ancri, and C. Jacobs* S-86

Ouabain-like natriuretic factor and atrial natriuretic factor in pregnancy. *P. Fievet, I. Gregoire, A. Fournier, D. Roth, G. Siegenthaler, N. El Esper, H. Favre, and A. De Bold* S-89

Is the effect of calcium diet or parathyroidectomy on the development of hypertension in spontaneously hypertensive rats mediated by atrial natriuretic peptide? *Helmut Geiger, Udo Bahner, Miklós Palkovits, Birgitt Seewaldt, and August Heidland* S-93

Mechanism of action of atrial natriuretic peptides does not involve adenylate cyclase system of different rat brain areas. *Helmut Geiger, Udo Bahner, Miklós Palkovits, Éva Mezey, and August Heidland* S-98

Atrial natriuretic peptide in gentamicin-induced acute renal failure. *Klaus Schafferhans, Ekkehard Heidbreder, Sigrid Sperber, Jobst Dämmrich, and August Heidland* S-101

The effect of atrial natriuretic factor on blood pressure and renal function of long-term hypothyroid rats. *Giovambattista Capasso, Dario R. Giordano, Giuseppe Capodicasa, and Natale G. DeSanto* S-104

Catecholamines and control of blood pressure in hemodialysis and hemofiltration. *Jonas Bergström* S-110

DYSREGULATION OF BLOOD PRESSURE

Blood pressure and hypertension in childhood: Epidemiology, diagnosis, and treatment. *Natale G. DeSanto, Maurizio Trevisan, Giovambattista Capasso, Dario R. Giordano, Maurizio Latte, and Vittorio Krogh* S-115

Systemic and glomerular hypertension in progressive renal disease. *Sharon Anderson* S-119

Sex dependence of body fat distribution and fluid volumes in hypertension. *Jocelyn M. Raison, Michel E. Safar, Rish E. Asmar, Apostolos M. Achimastos, and Gerhard M. London* S-122

Association of HLA DR4 with the risk of recurrence of pregnancy hypertension. *Pierre Simon, Renée Fauchet, Michel Pilorge, Christian Calvez, Bernard Le Fiblec, Gérard Cam, Kim Seng Ang, Bernard Genetet, and Bruno Cloup* S-125

Hypertension in renal transplantation. *Michel Olmer, Réchad Noordally, Yvon Berland, Paul Casanova, Christian Coulange, and Marius Rampal* S-129

Hypertension in diabetes mellitus. *Christoph Hasslacher, Eberhard Ritz, Wolfgang Tschöpe, Gerhard Gallasch, and Johannes F.E. Mann* S-133

The Captopril challenge test as a screening test for renovascular hypertension. *A. Idrissi, A. Fournier, H. Renaud, B. Boudailliez, N. El Esper, P. Fievet, P.F. Westeel, R. Makdassi, and A. Remond* S-138

Captopril scintigraphy in the diagnosis of renovascular hypertension. *George N. Sfakianakis, David J. Jaffe, and Jacques J. Bourgoignie* S-142

Predictability of a standarized Captopril^{R}-test in hypertension in end-stage renal failure. *Dominique C. Schohn, Henri A. Jahn, and Renée L. Schmitt* S-145

Renovascular responses to angiotensin II in SHR. Effect of prostaglandin synthesis blockade. *Ettore Guidi and Norman K. Hollenberg* S-149

Orthostatic hypotension: Idiopathic and uremic. *Vito M. Campese* S-152

THERAPEUTIC ASPECTS OF HYPERTENSION

Early functional effects of various antihypertensive drugs in chronically uremic rats. *Markus Teschner, Udo Bahner, Roland M. Schaefer, Jutta Möslein, and August Heidland* S-156

Renal tubular actions of antihypertensive agents. *Wadi N. Suki and Diane Rouse* S-160

Recognizing and treating two types of long-term vasoconstriction in hypertension. *John H. Laragh and Lawrence M. Resnick* S-162

Dietary potassium and blood pressure. *Wadi N. Suki* S-175

Diuretics as antihypertensive drugs. *Jacques Guédon, Michel Chaignon, and Michel Lucsko* S-177

Therapeutic effect and complication profile of clonidine-beta-blocker combinations. *Raymond Vanholder, Norbert Lamiere, and Severin Ringoir* S-181

Natriuretic and renal hemodynamic effects of nicardipine in essential hypertension. *Michel Chaignon, Marc Bellet, Michel Lucsko, Catherine Rapoud, and Jacques Guédon* S-184

Contents continued on next page

Influence of sodium dialysate variation on hemodynamic stability. *Didier Aguilera, Nabil Diab, and Jean-Marie Faivre* S-187

Pathogenesis of hypertension in hemodialysis patients: A pharmacological study. *Alessandro Zuccalà, Antonio Santoro, Giuseppe Ferrari, and Pietro Zucchelli* S-190

Hemodynamic and hormonal effects of low or high sodium hemodialysis. *Bernhard K. Krämer, Klaudia M. Ress, Thomas M. Ulshöfer, and Teut Risler* S-192

Inducing hyperkalemia by converting enzyme inhibitors and heparin. *Dominique Durand, Jean-Louis Ader, Jean-Pierre Rey, Tuan Tran-Van, Jean-Jacques Lloveras, Pauline Bernadet, and Jean-Michel Suc* S-196

Role of antihypertensive drugs in the therapy of patients on regular dialysis treatment. *Sylvia Sulková and Albert Válek* S-198

Effect of converting enzyme inhibitors on cardiac changes in experimental uremia. *Michael Rambausek, Gerhard Mall, Sylvia Kollmar, and Eberhard Ritz* S-201

Antihypertensive efficacy of enalapril maleate on impaired renal function. *Pasquale Coratelli, Erasmo Buongiorno, Michele Giannattasio, and Giuseppe Passavanti* S-204

KIDNEY INTERNATIONAL

Volume 34, Number 4, October 1988

Official Journal of the International Society of Nephrology

Le Journal de la Société Internationale de Néphrologie

Table of contents

EDITORIAL REVIEW

Structure and function of the inner medullary collecting duct. *Kirsten M. Madsen, William L. Clapp, and Jill W. Verlander* 441

LABORATORY INVESTIGATION

Renal excretion of rubidium and potassium: An electron microprobe and clearance study. *Franz-X. Beck, Adolf Dörge, Gerhard Giebisch, and Klaus Thurau* 455

Alpha$_1$ adrenergic receptors in mesenteric arteries of rats with chronic renal failure. *George Z. Fadda, Shaul G. Massry, Mahmoud El-Refai, and Vito M. Campese* 463

Lupus nephropathy in New Zealand F1 hybrid mice treated by (-)15-deoxyspergualin. *Michihito Okubo, Keiichi Inoue, Naoki Umetani, Naoyuki Sato, Kouju Kamata, Yoshihiko Masaki, Takehiko Uchiyama, Xiao-Jie Yan, Takaaki Aoyagi, and Toshikazu Shirai* 467

Role of iron in postischemic renal injury in the rat. *Mark S. Paller and Bo E. Hedlund, with the technical assistance of Joseph J. Sikora, Anne Faassen, and Richard Waterfield* 474

Sex related differences in glomerular ultrafiltration and proteinuria in Munich-Wistar rats. *Andrea Remuzzi, Stefania Puntorieri, Andrea Mazzoleni, and Giuseppe Remuzzi* 481

Immunological aspects of acute ureteral obstruction: Immune cell infiltrate in the kidney. *George F. Schreiner, Kevin P.G. Harris, Mabel L. Purkerson, and Saulo Klahr* 487

Evidence suggesting a role for hydroxyl radical in puromycin aminonucleoside-induced proteinuria. *Vashu Thakur, Patrick D. Walker, and Sudhir V. Shah* 494

CLINICAL INVESTIGATION

Effects of nonsteroidal antiinflammatory drugs on renal function in sickle cell anemia. *Michael Allon, Lydia Lawson, James R. Eckman, Vera Delaney, and Edmund Bourke* 500

Localization of the gene for X-linked Alport's syndrome. *Han Brunner, Cock Schröder, Cor van Bennekom, Eric Lambermon, Joep Tuerlings, Daria Menzel, Hermann Olbing, Leo Monnens, Berend Wieringa, and Hans-Hilger Ropers* 507

Prognostic factors in diffuse proliferative lupus glomerulonephritis. *Alex B. Magil, Martin L. Puterman, Henry S. Ballon, Victor Chan, David S. Lirenman, Angus Rae, and Roger A.L. Sutton* . 511

A six-year comparison of patient and technique survivals in CAPD and HD. *Rosario Maiorca, E. Vonesh, G.C. Cancarini, A. Cantaluppi, L. Manili, G. Brunori, C. Camerini, P. Feller, and A. Strada* 518

Working capacity is increased following recombinant human erythropoietin treatment. *Gert Mayer, Johanna Thum, Eva Maria Cada, Hans Krister Stummvoll, and Helmut Graf* 525

Metabolism of complement factor D in renal failure. *Manuel Pascual, Gertraud Steiger, Jurek Estreicher, Kevin Macon, John E. Volanakis, and Jürg A. Schifferli* 529

A renal biopsy study of hepatitis B virus-associated nephropathy in Korea. *Hyun Soon Lee, Yong Choi, Suk Hee Yu, Haeng Il Koh, Myung Jae Kim, and Kwang Wook Ko* 537

Contents continued on next page

Anti-hormones and Blood Pressure

Villeneuve-lèz-Avignon, France, November 5–6, 1987

Table of contents

Introduction. *Jean-Pierre Grünfeld, Pierre Corvol, and Serge Jard* S-1

Molecular mechanism of antisteroid hormones at the receptor level. *Etienne-Emile Baulieu* . S-2

ANTIMINERALOCORTICOIDS

Extrarenal effects of aldosterone and antimineralocorticoid compounds. *Anne-Marie Moura, Marielle Angeli, and Manuel Worcel* S-8

The structure of the amiloride sensitive apical Na^+ channel from pig kidney. *Christian Frelin, Pascal Barbry, Olivier Chassande, Paul Vigne, and Michel Lazdunski* S-12

Long-term experience of spironolactone in essential hypertension. *Xavier Jeunemaitre, Carmen Kreft-Jais, Gilles Chatellier, Jacques Julien, Patrice Degoulet, Pierre-Francois Plouin, Joel Ménard, and Pierre Corvol* S-14

ANTIGLUCOCORTICOIDS

Glucocorticoids and glucocorticoid antagonists: Lessons from RU 486. *George P. Chrousos, Louisa Laue, Lynette K. Nieman, Sinichi Kawai, Robert U. Udelsman, David D. Brandon, and D. Lynn Loriaux* S-18

Glucocorticoid antagonists as probes to study the vascular effects of glucocorticoids. *Jean-Pierre Grünfeld and Laure Eloy* S-24

PEPTIDE HORMONE ANTAGONISTS

Physiological role of endogenous peptide effectors studied with peptidase inhibitors. *Bernard P. Roques* S-27

VASOPRESSIN AND VASOPRESSIN ANTAGONISTS

The development of potent and specific vasopressin antagonists. *W.H. Sawyer and M. Manning* .. S-34

Mechanisms of action of vasopressin and vasopressin antagonists. *Serge Jard* S-38

Vasopressin antagonists and their use in animal studies. *Jean-Francois Liard* S-43

Use of vasopressin antagonists in human diseases. *Marc Thibonnier* S-48

KININS AND KININ ANTAGONISTS

Kinins paracrine hormone. *Oscar A. Carretero and A. Guillermo Scicli* S-52

Anti-hormones and blood pressure: Bradykinin antagonists in blood pressure regulation. *Irene Gavras and Haralambos Gavras* S-60

ANTAGONISTS OF THE RENIN-ANGIOTENSIN SYSTEM

Role of endogenous bradykinin in blood pressure control of conscious rats. *Bernard Waeber, Jean-Francois Aubert, Jean-Pierre Flückiger, Jürg Nussberger, Raymond J. Vavrek, John M. Stewart, and Hans R. Brunner* S-63

Angiotensin receptor: Properties and relevance to the development of antagonists. *Richard L. Soffer, M.A. Ravi Kiron, Elizabeth Rosenberg, and Sudip Bandyopadhyay* S-69

Renin inhibition: Immunological procedures and renin inhibitor peptides. *Pierre Corvol and Joel Ménard* S-73

Renin secretion responsiveness: Understanding the efficacy of renin-angiotensin inhibition. *Hans R. Brunner, Bernard Waeber, and Jürg Nussberger* S-80

EDITORIAL REVIEW

The untoward effects of the anions of dialysis fluids. *Richard L. Veech* 587

LABORATORY INVESTIGATION

Transfer of experimental glomerulonephritis in chickens by mononuclear cells. *W. Kline Bolton, Manik Chandra, Timothy M. Tyson, Paul R. Kirkpatrick, Marc J. Sadovnic, and Benjamin C. Sturgill* 598

Local formation of immune deposits in rabbit renal proximal tubules. *Atsushi Fukatsu, Yukio Yuzawa, Neal Niesen, Seiichi Matsuo, Peter R.B. Caldwell, Jan R. Brentjens, and Giuseppe Andres* 611

Effect of long-term, alternate day feeding on renal function in aging conscious rats. *James J. Gehrig, Jr., Jon Ross, and Rex L. Jamison* 620

Angiotensin influences on tubuloglomerular feedback mechanism in hypertensive rats. *Wann-Chu Huang, P. Darwin Bell, David Harvey, Kenneth D. Mitchell, and L. Gabriel Navar* 631

Effect of heparin on the glomerular structure and function of remnant nephrons. *Iekuni Ichikawa, Yoshiyuki Yoshida, Agnes Fogo, Mabel L. Purkerson, and Saulo Klahr* 638

Effect of valproate on renal metabolism in the intact dog. *Manuel Rengel-Aranda, André Gougoux, Patrick Vinay, and José Miguel Lopez-Novoa* 645

Morphological heterogeneity of the rabbit collecting duct. *Yvonne Ridderstrale, Michael Kashgarian, Bruce Koeppen, Gerhard Giebisch, David Stetson, Thomas Ardito, and Bruce Stanton* 655

Effects of succinylacetone on the uptake of sugars and amino acids by brush border vesicles. *Patricia D. Spencer, Marvin S. Medow, Linda C. Moses, and Karl S. Roth* 671

Treatment of murine lupus nephritis with cyclophosphamide or total lymphoid irradiation. *Mark Waer, Boudewijn Van Damme, Peter Leenaerts, Leo Roels, Emmanuel Van Der Schueren, Michel Vandeputte, and Paul Michielsen* 678

CLINICAL INVESTIGATION

Hypertension in autosomal dominant polycystic kidney disease. *Patricia E. Bell, Kenneth F. Hossack, Patricia A. Gabow, Jacques A. Durr, Ann M. Johnson, and Robert W. Schrier* .. 683

Erythrocyte Na,K pump activity and arterial hypertension in uremic dialyzed patients. *Roberto Boero, Cesare Guarena, Ilario M. Berto, Maria C. Deabate, Clelia Rosati, Francesco Quarello, and Giuseppe Piccoli* 691

Mineralocorticoid activity and the excretion of an oral potassium load in normal man. *Ronald J. Hené, Hein A. Koomans, Anton J. Rabelink, Peter Boer, and Evert J. Dorhout Mees* 697

Morphometric analysis of pre-eclampsia in women biopsied in pregnancy and post-partum. *David K. Packham, Douglas C. Mathews, Kenneth F. Fairley, Judith A. Whitworth, and Priscilla S. Kincaid-Smith* 704

Contents continued on next page

Renal 25-hydroxyvitamin D_3-1-hydroxylase in patients with renal disease. *Kenichi Satomura, Yoshiki Seino, Kanji Yamaoka, Yoshiyuki Tanaka, Makoto Ishida, Hyakuji Yabuuchi, Yoko Tanaka, and Hector F. DeLuca* 712

Effect of synthetic human atrial natriuretic peptide (102-126) in nephrotic syndrome. *Robert Zietse and Maarten A. Schalekamp* 717

TECHNICAL NOTE

Measurement of GFR with non-radioisotopic radio contrast agents. *William Dalmeida and Wadi N. Suki* 725

EDITORIAL REVIEW

Function and control of Na-K-ATPase in single nephron segments of the mammalian kidney. *Alain Doucet* 749

LABORATORY INVESTIGATION

Virulence of wild-type *E. coli* uroisolates in experimental pyelonephritis. *Gerald J. Domingue, Rodolfo Laucirica, Prabhakar Baliga, Steve Covington, Jaime A. Robledo, and Su-Chen Li* 761

Effect of fasting on lysosomes in kidney cortex of glomerulonephritic rats. *Hans-Jacob Haga, Knut-Jan Andersen, Bjarne M. Iversen, Jarle Ofstad, Miloslav Dobrota, and Roald Matre* . 766

Verapamil reverses PTH- or CRF-induced abnormal fatty acids oxidation in muscle. *Alessandra F. Perna, Miroslaw Smogorzewski, and Shaul G. Massry* 774

Nonimmunological alterations of glomerular filtration by s-PAF in the rat kidney. *Ullrich S. Schwertschlag, Vincent W. Dennis, J. Allan Tucker, and Giovanni Camussi* 779

Effects of histamine and its receptor antagonists on peritoneal permeability. *Avshalom Shostak, Eva Chakrabarti, Przemyslaw Hirszel, and John F. Maher* 786

Acidosis and hypoxic medullary injury in the isolated perfused kidney. *Paul F. Shanley, Joseph I. Shapiro, Laurence Chan, Thomas J. Burke, and Ginger C. Johnson* 791

Fatty acid oxidation in the myocardium: Effects of parathyroid hormone and CRF. *Miroslaw Smogorzewski, Alessandra F. Perna, Peggy R. Borum, and Shaul G. Massry* 797

CLINICAL INVESTIGATION

Deferoxamine and coated charcoal hemoperfusion to remove aluminum in dialysis patients. *James T. McCarthy, Dawn S. Milliner, David F. Schmidt, Brian J. Schniepp, Stephen B. Kurtz, and William J. Johnson* 804

The renal functional reserve in health and renal disease in school age children. *Enrique Molina, José Herrera, and Bernardo Rodríguez-Iturbe*..... 809

Causes, kinetics and clinical implications of post-hemodialysis urea rebound. *Luciano A. Pedrini, Samir Zereik, and Samir Rasmy*..... 817

Atrial natriuretic peptide and the renal response to hypervolemia in nephrotic humans. *Craig Peterson, Berit Madsen, Andrew Perlman, Alex Y.M. Chan, and Bryan D. Myers* 825

Serial assessment of glomerular filtration rate in lupus nephropathy. *Michelle Petri, Linda Bockenstedt, Joan Colman, Quinn Whiting-O'Keefe, Gregory Fitz, Anthony Sebastian, and David Hellmann* 832

Oral calcitriol and calcium: Efficient therapy for uremic hyperparathyroidism. *L. Darryl Quarles, Giora A. Davidai, Steve J. Schwab, Dorothy W. Bartholomay, and Bruce Lobaugh*..... 840

Ultrafiltration coefficients of glomeruli from human biopsies. *Walter P. Richardson, Ruth Hassanein, Robert P. Pinnick, and Virginia J. Savin* 845

Dose-effect and pharmacokinetics of estrogens given to correct bleeding time in uremia. *Gianluigi Viganò, Flavio Gaspari, Massimo Locatelli, Fiorenza Pusineri, Maurizio Bonati, and Giuseppe Remuzzi* 853

Contents continued on next page

Progression of chronic renal failure is related to glucocorticoid production. *Mackenzie Walser and Lynn Ward* 859

NEPHROLOGY FORUM

Nephropathy in falciparum malaria. *Visith Sitprija* 867

INTERNATIONAL SOCIETY OF NEPHROLOGY

Meetings 879

Awards and Grants 881
